Senior Research Analyst:

Assists experienced professionals in a variety of research and analysis tasks. Collects, compiles, verifies, and analyzes data under direct supervision. Conducts literature reviews and writes sections of proposals and deliverables. May perform computer modeling or simple statistical analyses using standard software packages. Works on assignments that are simple to moderately complex under direct supervision. With more tenure in position, may independently perform a variety of research and analytical tasks and may provide day-to-day task supervision to less experienced staff. Typically requires a Bachelor's degree and 0 to 2 years of related experience.

Research Consultant:

Performs a variety of research and consulting-related tasks. May provide training and guidance to less experienced staff. Reviews and analyzes collected data using standard practices and techniques in the field(s) of specialization. Applies sound quantitative and/or qualitative analysis techniques and methods. Independently works on assignments that are complex under indirect supervision where there is latitude for independent action or decision-making. Demonstrates capabilities in day-to-day management of project tasks and budgets. Is developing technical expertise in a substantive field and supervisory capabilities. Typically requires a Master's degree with 0 to 3 years of related experience or a Bachelor's degree with a minimum of 3 years of related experience.

Consultant:

Leads and coordinates complex components of large projects or series of smaller projects with responsibility for the application of advanced methods and techniques in a particular field of specialization. May collaborate with quantitative specialists including applications programmers to design and develop questionnaires, instruments, and databases. Makes significant contributions to proposal efforts including coordinating and reviewing the contribution of less senior staff and troubleshoots problems or questions throughout the proposal process. Typically requires a Master's degree with a minimum of 3 to 5 years of related experience or a Ph.D. with 1 to 2 years of post-graduate experience.

Senior Consultant:

Contributes to business development by managing proposal efforts and identifying new business opportunities with existing clients. Directs and manages large projects or a series of smaller projects with responsibility for budget management, project deliverables, client relations and staff supervision. Ensures that all projects are conducted with sound methods, and techniques. Typically requires a Master's degree with a minimum of 7 to 10 years of post-graduate experience or a Ph.D. with a minimum of 5 to 7 years of post-graduate experience.

Associate Director:

Directs and manages large projects or a series of smaller projects with responsibility for budget management, project deliverables, client relations, and staff supervision. Manages multiple direct reports. Ensures that all projects are conducted with sound methods and techniques. Associate Director candidates should have a Master's degree or Ph.D. with approximately 10 to 12 years of relevant experience.

Managing Consultant:

Directs and manages the planning, design and implementation of projects. Serves as the primary client contact for methodological and technical expertise and translates client needs and/or objectives into specific deliverables in a timely and cost-efficient manner. Ensures that all research projects are conducted with sound methods and approaches. Managing Consultant candidates should have a Master's degree or Ph.D. with approximately 10 to 12 years of relevant experience.

Managing Director:

Directs proposal efforts and manages business development and client relationship activities for assigned line of business. Maintains strong business development relationships and is regarded within substantive field as an industry expert. Directs the planning, design, and implementation of projects and is accountable for project financial performance and client satisfaction. Serves as the overall client lead for projects. Ensures that all projects are conducted with sound methods and techniques. Manages multiple direct reports. Managing Director candidates should have a Master's degree or Ph.D. with at least 12 years of relevant experience.
